Check Scanning

The cost-effective solution that integrates with your accounting system

Convenient. Compliant. Secure.

The leader in enterprise payment solutions for property managers

The PropertyBridge Check Scanning solution is a robust, Web-based image capture, storage and processing solution that enables you to electronically deposit checks of all types.

The PropertyBridge Check Scanning solution is part of a complete family of solutions that is coordinated with the typical payment-cycle of a resident. The PropertyBridge Payments Platform offers the widest range of payment types and channels available to property managers.

The PropertyBridge Check Scanning solution seamlessly converts all paper checks (consumer, business, money order and cashiers checks) into electronic transactions. Every payment made is fully integrated with your existing accounting system. That means efficient reconciliation and reporting. Plus, all transactions are fully compliant with state and federal laws.

PropertyBridge offers the only all-points enterprise payment solution specifically for multi-location property management companies. With a complete suite of tightly integrated payment services, the PropertyBridge Payments Platform spans payment types (credit card, electronic and paper checks) and channels (online, in person and by phone) through a single, web-based interface.

What is Check 21?

Check 21 allows a company to convert any type of paper check into a digital image, including corporate checks, consumer checks, cashiers checks, third-party checks and money orders. Once converted to a digital image, checks are then processed as an ACH or Check 21 transaction.

Benefits

- Provides a simple, efficient way to handle paper checks
- Eliminates trips to the financial institution to deposit checks
- Offers a single, integrated view of all payments across the portfolio
- Ensures that all payments are fully compliant and secure
- Improves cash management with next day funding

Features

- Supports single check handling or bulk processing of items
- Resident information is associated with the MICR for faster processing
- View payment status for all transactions via a single interface (approved, refunded, returned)
- Support for all major scanners including RDM 7000, Panini MVX and SB1000
- All checks processed as Check 21 (consumer, business, money order and cashiers checks)

Getting Started

It's easy to get started with PropertyBridge. Just call us today at 1 (866) RENT-002 and we'll show you how quickly a pilot program can be customized to meet your particular requirements.
