## Integrating for Success

### Domin-8 and PropertyBridge Join Forces

Domin-8 Enterprise Solutions, a provider of advanced software and services for the property management industry, and PropertyBridge, an electronic payments services provider for the real estate management industry, announced a partnership to integrate PropertyBridge's electronic payments technology with Domin-8's property management software.

PropertyBridge provides a compliant, secure, and convenient rent payment platform, according to Denis Clark, vice president of marketing for Domin-8. This solution allows property managers to offer their residents simple payment options, including credit cards, debit cards, and electronic checks (ACH). Domin-8 has now integrated this payment platform with its property management software. This integration allows residents to pay rent online and gives property managers an automated way to receive their funds faster. All payment information is electronically transferred to the property management software and applied to the resident's ledger, giving leasing agents more time to spend with prospects and residents.

"Domin-8's strategy is to deliver value to our customers by offering integrated value-added services through our property management software," says Clark. "We chose to partner with PropertyBridge because they, like Domin-8, understand the need to provide integrated solutions that address the needs of the property management industry. The PropertyBridge Payments Platform fits nicely into our strategy." □
